

# Mesh Security Cages

A comprehensive range of multi-purpose mesh storage cages, complete with mesh roof, for indoor or outdoor use. Suitable for most applications where light security / safety is required. Standard cages are designed around our 1220mm wide x 2440mm high panel. Non-standard cages are available to suit individual requirements.

The standard finish is hot; dip galvanized. A more cost effective paint finish is available for indoor use.

Panels are bolted together with M8 bolts and nuts, they are also fixed to the floor with pan head screws and 6mm plastic plugs. Posts are fixed to the floor with M12 anchor bolts.
